Hands-on Lab: Creating a Simple Web page

Effort: 25 min

You are a web developer who has been approached by the fan club for IBM founder, **Thomas J. Watson Sr.**, to create a web page for them. In this lab, we'll create a web page with details of Mr. Watson.

Objectives

After this exercise, you will be able to do the following:

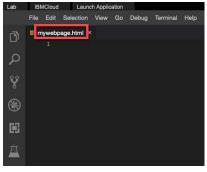

```
1. 1
2. 2
3. 3
4. 4
5. 5
6. 6
7. 7
8. 8
9. 9
10. 10
1. 1. Create a new HTML document
2. 2. Specify the DOCTYPE
3. 3. Add the head and body elements
4. 4. Add a title
5. 5. Add a heading
6. 6. Add a paragraph
7. 7. Add an image
8. 8. Create a list of items
9. 9. Add a table of data
10. 10. Add links to other pages
```

Create a new HTML document

Let's create mywebpage.html file where we will be typing in our html markup.

Open mywebpage.html in IDE

Every line of HTML you write from now on will be saved into this file.

You are now ready to start creating your web page.

Specify <!DOCTYPE>

All HTML documents start with the <!DOCTYPE> declaration.

This line tells the web browser that the file contains HTML code. This is not an HTML tag.

This line is specified as follows:

1. 1

1. <!DOCTYPE html>

Copied!

Insert the above code into the HTML file you created in the previous step.

Your file should now look like this:

Add the <head> and <body> elements

Now that we've added the doctype, let's begin adding the HTML code.

An HTML file begins with the <html> tag and ends with the corresponding closing </html> tag. All HTML code will be placed within these two tags.

The HTML document is divided up into two sections: a head and a body

The <head> tag defines the metadata about the page, which is used by browsers and search engines.

This information may include the document title, character set, styles to be used, scripts, etc.

Contents of <head> section are not displayed to the user.

The <body> tag defines the document body, and contains all the visible content like headings, paragraphs, images, links, tables, etc.

The skeleton of an HTML document looks like this:

Add the code below to your file, beneath your doctype declaration.

Add a title

Copied!

The title of the page appears on the browser tab, when you open the webpage in the browser.

We define it using the <title> tag, which will be added within the <head> section.

Now, let us define our webpage using this element.

Add the code below inside the <head> section of your document.

```
    1. 1
    title>Thomas J. Watson Sr - Fan Page</title>
    Copied1
```

Your code should now look like this:

```
1. 1
2. 2
3. 3
4. 4
5. 5
6. 6
7. 7
8. 8
9. 9
1. <IDOCTYPE html>
2. <html>
3. <head>
4. <title>Thomas J. Watson Sr - Fan Page</title>
5. </head>
6. <body>
7.
8. </body>
9. </html>
Copied!
```

Add a heading to the page

about:blank

To add a heading, we will use the <h1> tag. This stands for "heading 1" and is used to indicate the most important heading. HTML headings go from <h1> to <h6>, to represent a descending order of importance.

Type the below code in the <body> section.

1. 1

1. <h1> Thomas J. Watson </h1>

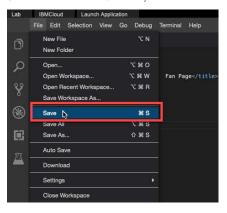

Copied!

Your code should look like this:

1. 1
2. 2
3. 3
4. 4
5. 5. 5
6. 6
6. 7
7. 7
8. 8
9. 9
1. <[DOCTYPE html>
2. <html>
3. <html>
3. <html>
4. <title>Thomas J. Watson Sr - Fan Page</title>
5. </html>
6. <body
7. <html>
7. <html>
8. </hd>
8. </hd>

Copied!

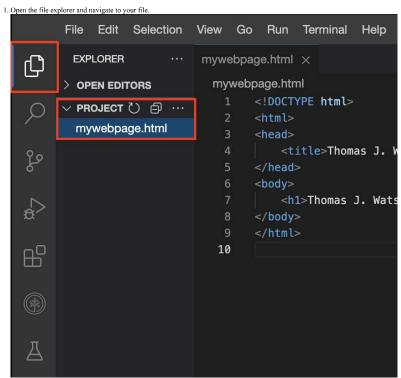

Go to the File menu and click on Save to save your code.

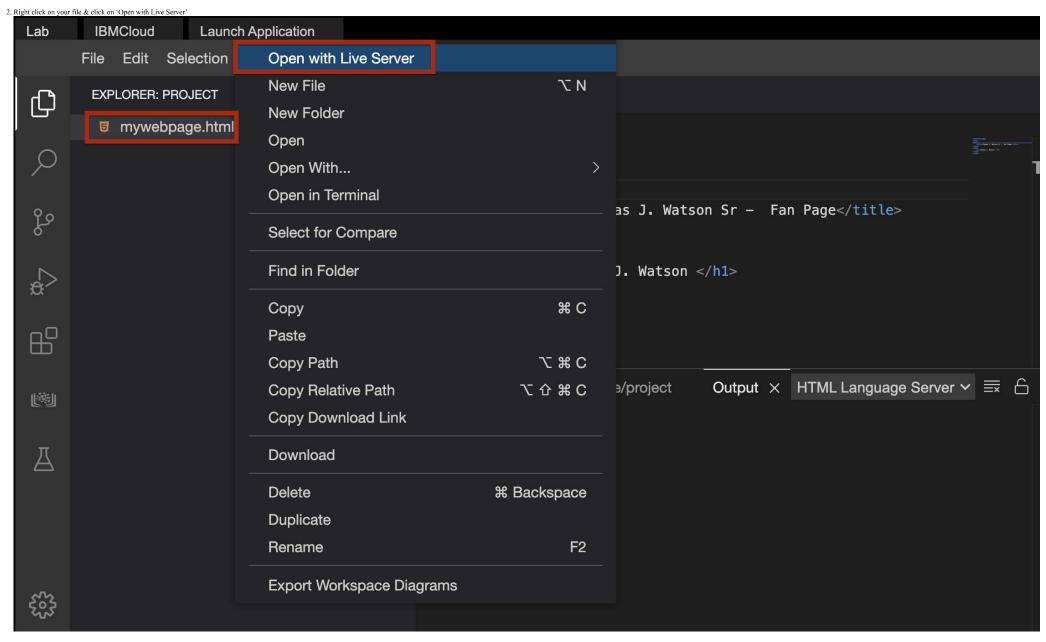

Preview your HTML File

To preview your file, you can use the built-in Live Server extension by following the instructions below.

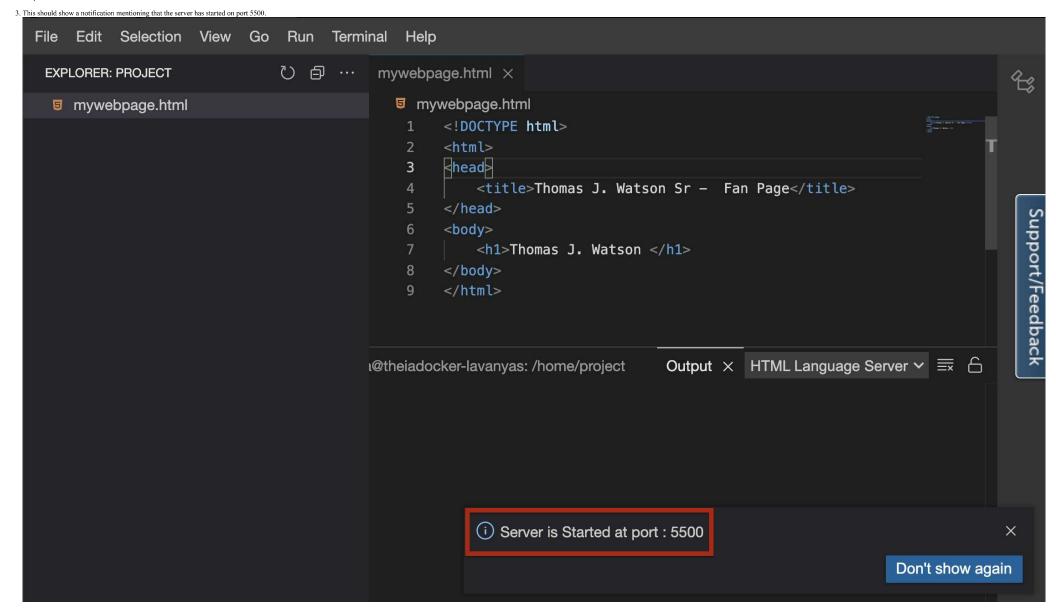

about:blank 3/15

about:blank 4/15

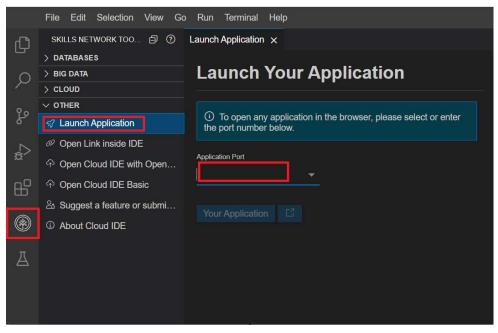

about:blank 5/15

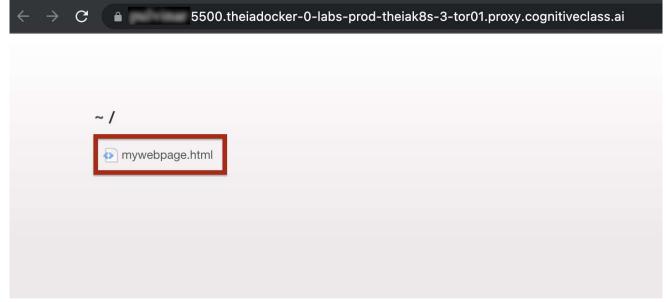

4. Click on the button below to launch the application or click Skills Network button on the left to open the "Skills Network Toolbox". Click "Other" then "Launch Application". From there, enter the port number as 5500 and launch your application.

Preview HTML

about:blank 6/15

5. Click on the file name to view its preview.

Add a Paragraph

Now, let's add a short description.

The tag is used to define a paragraph.

In this example, we'll add a few lines about Thomas J. Watson.

Add the below code after the <h1> heading .

```
1. 1
```

1. sp.Thomas J. Watson, Sr. is the American industrialist, who built the International Business Machines Corporation (IBM) into the largest manufacturer of electric typewriters and data-processing equipment in the world.

Copied!

Your code should look like this now.

```
1. 1
2. 2
3. 3
4. 4
4. 5
5. 5
6. 6
7. 7
7. 8
8. 8
9. 9
10. 10
11. 11
1. (IDCTYPE html)
2. <html)
3. heado
4. <itile>Thomas J. Watson Sr - Fan Page</title>
5. <html
5. <html
6. <bd/>
6. <bd/>
7. <html
7. <html
7. <html
8. <a href="https://doi.org/10.1001/j.com/refered-to-10.1001/j.com/refered-to-10.1001/j.com/refered-to-10.1001/j.com/refered-to-10.1001/j.com/refered-to-10.1001/j.com/refered-to-10.1001/j.com/refered-to-10.1001/j.com/refered-to-10.1001/j.com/refered-to-10.1001/j.com/refered-to-10.1001/j.com/refered-to-10.1001/j.com/refered-to-10.1001/j.com/refered-to-10.1001/j.com/refered-to-10.1001/j.com/refered-to-10.1001/j.com/refered-to-10.1001/j.com/refered-to-10.1001/j.com/refered-to-10.1001/j.com/refered-to-10.1001/j.com/refered-to-10.1001/j.com/refered-to-10.1001/j.com/refered-to-10.1001/j.com/refered-to-10.1001/j.com/refered-to-10.1001/j.com/refered-to-10.1001/j.com/refered-to-10.1001/j.com/refered-to-10.1001/j.com/refered-to-10.1001/j.com/refered-to-10.1001/j.com/refered-to-10.1001/j.com/refered-to-10.1001/j.com/refered-to-10.1001/j.com/refered-to-10.1001/j.com/refered-to-10.1001/j.com/refered-to-10.1001/j.com/refered-to-10.1001/j.com/refered-to-10.1001/j.com/refered-to-10.1001/j.com/refered-to-10.1001/j.com/refered-to-10.1001/j.com/refered-to-10.1001/j.com/refered-to-10.1001/j.com/refered-to-10.1001/j.com/refered-to-10.1001/j.com/refered-to-10.1001/j.com/refered-to-10.1001/j.com/refered-to-10.1001/j.com/refered-to-10.1001/j.com/refered-to-10.1001/j.com/refered-to-10.1001/j.com/refered-to-10.1001/j.com/refered-to-10.1001/j.com/refered-to-10.1001/j.com/refered-to-10.1001/j.com/refered-to-10.1001/j.com/refered-to-10.1001/j.com/refered-to-10.1001/j.com/refered-to-10.1001/j.com/refered-to-10.1001/j.com/refered-to-10.1001/j.com/refered-to-10.1001/j.com/refered-to-10.1001/j.com/refered-to-10.1001/j.com/refered-to-10.1001/j.com/refered-to-10.1001/j.com/refered-to-10.1001/j.com/refered-to-10.1001/j.com/refered-to-10.1001/j.com/refered-to-10.1001/j.com/refered-to-10.1001/j.com/refered-to-10.1001/j.com/refered-to-
```

Copied!

Go to the File menu and click on Save to save your code.

The resulting web page looks like this.

Add an Image

An tag is used to add an image.

Let's add an image of Thomas J. Watson after the heading.

To add an image you need to know the image file name and mention it in the 'src' attribute.

The 'src' attribute specifies an external resource that you want to link, such as the URL of an image.

You can optionally specify how many pixels the width and height of the image should be.

Type the below code after the <h1> heading .

1. 1

 $1. < \texttt{img src="https://upload.wikimedia.org/wikipedia/commons/7/7e/Thomas_J_Watson_Sr.jpg" width="300" height="300" hei$

Copied!

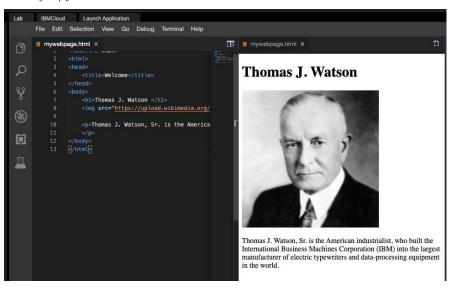

Your code should look like this now.

- 1. 1 2. 2 3. 3 4. 4 5. 5 6. 6 7. 7 8. 8 9. 9 10. 10 11. 11 12. 12
- about:blank

```
1. <|DOCTYPE html>
2. <html>
3. <html>
3. <html>
4. <title>Thomas J. Watson Sr - Fan Page</title>
5. </head>
4. <title>Thomas J. Watson Sr - Fan Page</title>
5. </head>
6. <html>
7. <html>
7. <html>
8. <ing src-"https://upload.wikimedia.org/wikipedia/commons/7/7e/Thomas_]_Watson_Sr.jpg" width="300" height="300">
9.
10. Thomas J. Watson, Sr. is the American industrialist, who built the International Business Machines Corporation (IBM) into the largest manufacturer of electric typewriters and data-processing equipment in the world.
11. 
12. </body>
13. </braid>
13. </braid>
14. CopiedI
```

Go to the File menu and click on Save to save your code.

The resulting web page looks like this.

Create a List

To create a list of items, we can use the <01> (ordered list) tag for numbered lists, and the <u1> (unordered list) tag for bulleted lists.

Each point within a list will be enlosed by a <1i> opening and closing tag, which represents a list item. This same tag is used for both ordered and unordered list.

Let's add a few more lines of information about Mr. Watson after the main paragraph, in the form of a list.

Type the below code after the paragraph.

Your code should look like this now.

1. 1 2. 2 3. 3 4. 4 5. 5 6. 6 7. 7 8. 8 9. 9 10. 10 11. 11

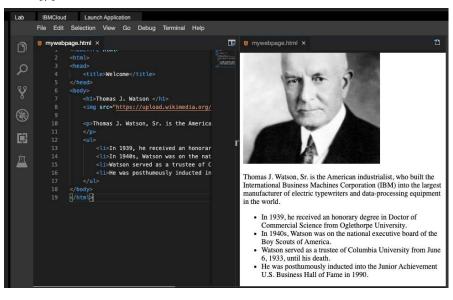

9/15

```
12. 12
13. 13
14. 14
15. 15
16. 16
18. 18
19. 19
 1. <!DOCTYPE html>
2. <html>
 3. <head>
4. <title>Thomas J. Watson Sr - Fan Page</title>
5. </head>
6. <body>
       <h1>Thomas J. Watson </h1>
       <img src="https://upload.wikimedia.org/wikipedia/commons/7/7e/Thomas_l_Watson_Sr.jpg" width="300" height="300">
       Thomas J. Watson, Sr. is the American industrialist, who built the International Business Machines Corporation (IBM) into the largest manufacturer of electric typewriters and data-processing equipment in the world.
10.
12.
       <l
          14.
15.
16.
17.
           He was posthumously inducted into the Junior Achievement U.S. Business Hall of Fame in 1990.
      18. </body>
19. </html>
```

Copied!

Go to the File menu and click on Save to save your code.

The resulting page looks like this.

Add a Table

A table is created using the tag.

Within the table, each row of data is represented using the
 (table row) tag.

The column or row headings can be specified by the (table heading) element.

Finally, each data element within the table cells is specified using the (table data) tag.

Let's add a heading and a table with three rows and two columns.

Type the below code after the

about:blank 10/15

```
10. 10
11. 11
12. 12
13. 13
14. 14

45. </html>
```

Copied!

Go to the File menu and click on Save to save your code.

The resulting table looks like this.

IBM Growth Over Years:

Year No. of Employees Gross Income (In m\$)

1925 3698 13 1930 6346 19 1935 8651 21

Add Links to other pages

Web pages connect to other web pages and files using hyperlinks.

A hyperlink is created using the anchor tag <a>.

Once you click on the link, the 'href' attribute tells the browser which web page you should be taken to.

Let's create a link to the official web page of IBM from the current page.

Within the main paragraph there is a reference to IBM, where we'll add the link.

Find the word IBM in the first paragraph and replace it with the code below.

1. 1

1. IBM

Copied!

Here is the complete HTML code of the web page.

about:blank

```
28. 28
29. 29
30. 30
31. 31
32. 32
33. 33
 33. 33
34. 34
35. 35
36. 36
37. 37
38. 38

5. </head>
 6. <body>
7. <h1>Thomas J. Watson </h1>
        <img src="https://upload.wikimedia.org/wikipedia/commons/7/7e/Thomas_J_Watson_Sr.jpg" width="300" height="300">
        Thomas J. Watson, Sr. is the American industrialist, who built the International Business Machines Corporation (<a href="https://www.ibm.com">IBM</a>) into the largest manufacturer of electric typewriters and data-processing equipment in the world.
 11.
        12.
13.
14.
           15.
16.
            He was posthumously inducted into the Junior Achievement U.S. Business Hall of Fame in 1990.
 <h1>IBM Growth Over Years: </h1>
        Employees 

            1925
               3698
            19 
            1935

            42. </ta

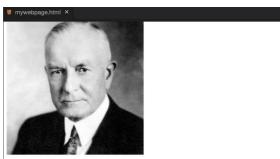

43.

44. </body>

45. </html>
        Copied!
```

Go to the File menu and click on Save to save your code.

You should then see the hyperlink like this.

Thomas J. Watson, Sr. is the American industrialist, who built the International Business Machines Corporation (IBM) into the largest manufacturer of electric typewriters and data-processing equipment in the world.

When you click on the hyperlink, your browser will navigate to the <u>IBM website</u>.

You should now see the complete web page using the Live Server extension. It should resemble the following page:

13/15 about:blank

Thomas J. Watson

Thomas J. Watson, Sr. is the American industrialist, who built the International Business Machines Corporation (IBM) into the largest manufacturer of electric typewriters and data-processing equipment in the world.

- In 1939, he received an honorary degree in Doctor of Commercial Science from Oglethorpe University.
- In 1940s, Watson was on the national executive board of the Boy Scouts of America.
- Watson served as a trustee of Columbia University from June 6, 1933, until his death.
- He was posthumously inducted into the Junior Achievement U.S. Business Hall of Fame in 1990.

IBM Growth Over Years:

Year Employees Gross Income (In m\$)

1925 3698 13 1930 6346 19 1935 8651 21

Congratulations

Congratulations!!! You have created your first web page.

If you haven't already done so, you should try creating a web page with your own details.
