1. Which of the following statements embeds an image in an HTML document? 1 / 1 point

   ○ <image>link_to_image</image>

   ○ <figure src="image URL">image name</figure>

   ◉ <img src="image URL">

   ○ <img href="image URL">image name</img>

   > ✓ **Correct**
   > Correct. The <img> element is used for images, with the "src" attribute defining the location of the image. Review the "Common HTML Elements" reading for further review on HTML images.

2. When defining a hyperlink (<a>), which attribute is used to specify the destination address? 1 / 1 point

   ◉ href

   ○ src

   ○ target

   ○ ref

   > ✓ **Correct**
   > Correct. This attribute defines the destination address in a hyperlink. Review the "Common HTML Elements" reading for further review on hyperlinks.

3. Which tag **CANNOT** be used as a container for text? I.e. does not use both an opening <> and closing </> tag 1 / 1 point

   ◉

   ○ <h1>

   ○ <p>

   ○ <body>

   > ✓ **Correct**
   > Correct. This is used as a single line break, and therefore does not need to enclose any data within it, making it able to be used without a closing tag. Review the "Common HTML Elements" reading for more practice with common HTML tags.

4. How are comments written in HTML? 1 / 1 point

   ○ #This is a comment

   ◉ < !-- This is a comment -- >

   ○ """This is a comment"""

   ○ /*This is a comment*/

   > ✓ **Correct**
   > Correct. An example of this can be found in the HTML features video.

5. Which tag is used to denote a cell of data within a table?

◉ <td>

◯ <tr>

◯ <th>

◯ <tc>

✓ **Correct**
Correct. This HTML tag stands for "table data" and is used to specify data within a table cell. Review the "Common HTML Elements" reading for further review on working with tables.

6. Which of the following is **NOT** an HTML tag?

◉ <!DOCTYPE html>

◯ <p>

◯ <article>

◯

✓ **Correct**
Correct. The <!DOCTYPE> declaration is not an HTML tag. It is an instruction to the browser about what document type to expect. Review the HTML features video for a more detailed explanation of this.

7. What is the **
** tag used for?

◯ To change the text color to brown

◯ To change the border

◉ To add a line break

◯ To make text bold

✓ **Correct**
Correct. The <br> tag is used to add a line break to your HTML content. Review the "Common HTML

Elements" reading for further review about this.

8. Which of the following denotes the *least* important heading?   1 / 1 point

- ⦿ <h6>
- ◯ <h1>
- ◯ <h10>
- ◯ <h5>

✓ **Correct**
Correct. HTML headings go from <h1> to <h6>, to represent a descending order of importance. Review the "Common HTML Elements" reading for further review about headings.

9. Which tag is used to create an ordered list?   1 / 1 point

- ◯
- ⦿
- ◯ <orderedlist>
- ◯

✓ **Correct**
Correct. The <ol> tag stands for ordered list, and can be used to create a list with each item denoted with an <li> tag (list item). Review the "Common HTML Elements" reading for more review with this.

10. Which of the following conditions must be met for scripting to be enabled in browsers? Select one or more options.   1 / 1 point

- ☑ The user has not disabled scripting for the current browser context

  ✓ **Correct**
  Correct. Scripting must be enabled in the browser. Review the HTML scripting video.

- ☑ The browser supports scripting

  ✓ **Correct**
  Correct. The browser in question must support scripting. Review the HTML scripting video.

- ☐ An embedded object is used without the sandbox attribute
- ☐ The browser context has the sandboxed browsing context flag set
